THE CHALLENGE IN TRACKING STEEL

Traditional ways of identifying steel are fraught with unreliability and inefficiency as sticker labels and markings can fall or wear off easily. Paperwork involved to track and trace steel assets can be misplaced. As a result, vital information on steel materials can be lost.

Innovating Solutions with GoTagID

GoTagID is the first of its kind tagging solution that provides reliable tracking and tracing capabilities after the point of sale. These capabilities are delivered in two ways through our Proprietary Rapide Tags and Endure Tags.

Rapide Tags are the affordable and reliable way to replace the high failure rates of existing sticker methodologies and have proven to hold up excellently through the processes of shipping and logistics prior to actual site implementation. The Rapide Tags also provide Green Steel manufacturers with a way to trace and store *Carbon Footprint information, Environmental Product Declaration (EPD) Documentation and other relevant Green Steel Certifications* unique to the material. In circumstances whereby steel is re-used repeatedly, Endure Tags can be deployed.

Endure Tags have been tested and proven to withstand high heat, vibration, mechanical impact, and corrosive conditions for at least 5 years. Both tags are specifically designed with state-of-the-art technology to enable tagging of steel and provide it with its own unique identity (ID) – allowing the *traceability of origin, factory manufacturing data, testing records, and present and historical geolocation.*

RFID is the primary technology enabling no line-of-sight for scanning and the advanced OCR technology serves as a failsafe backup.

Initial Stage - Tagging

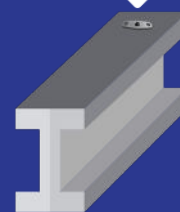

Rapide Tag Solution

Harsh Environments

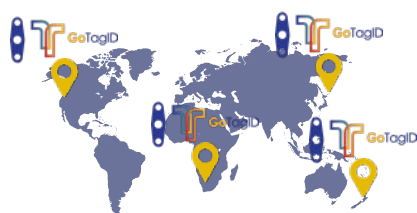

Secured Unique ID

Steel Materials Exposed in Harsh Environments

Endure Tag Solution

The Unique ID enables end users the ability at tracking and tracing asset data.

Geolocation for the traceability of origin, anywhere in the world.

Enhanced to withstand the harshest and most volatile conditions.

THE GoTagID Solution

Unique ID allows for the traceability of origin, factory manufacturing data and testing records to be captured and stored beyond the point-of-sale.

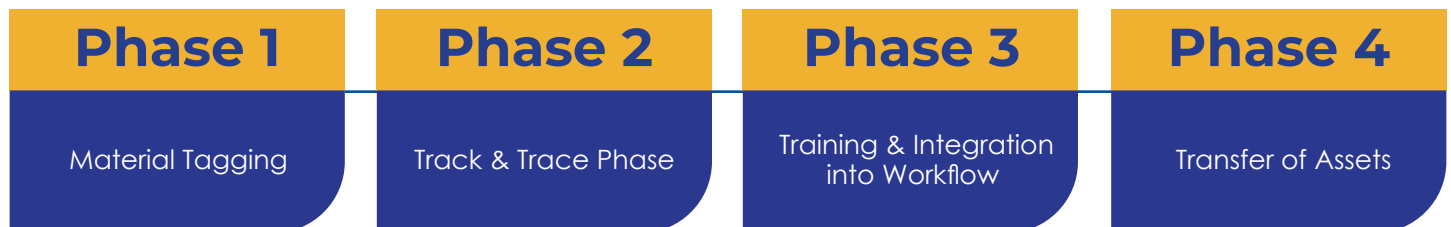

With just one simple scan you could retrieve all your product information and its geolocation. What's more, you can transfer the information to the next user. All information is stored in the cloud and is accessible 24/7/365 worldwide.

Compliant with BCA Reusability on steel BC1 2012 regulations (Design Guide on Use of Alternative Structural Steel and Electronic Regulatory Submission System ERSS).

Estimated Implementation Phase

The GoTagID team strives to cater to your steel tracking deadlines and requirements. Below is an estimated implementation phase for consideration, open for further consultation with our sales team to efficiently provide to your specific requirements.

LAUNCH OFFER

FREE TAG ASSETS*

+ FREE 6 MONTHS SUBSCRIPTION

TAG & TRACK TODAY!

*OPEN FOR NEGOTIATION FOR FINAL QUANTITY.
OFFER IS VALID TILL DECEMBER 2023.

 For more information, contact us today.

Help us understand your requirements.

The GoTagID team is here to support you.

Ready to start tagging and tracking your steel assets?

Reach out to us today and claim our Pre-Launch Offer.
